#### What is it?

A **tag cloud** is a group of tags or keywords or subjects which have been attached to an internet resource often a website. Here is a New Zealand example <u>http://mcgovernonline.blogspot.com/</u> - navigate to the bottom of the screen to see the tags.

In ELIScat tags have been attached to resources, to describe the information that can be found there.

### Why is it useful to an exporter using ELIScat?

You can click on a tag in the Tag Cloud and you will get a list of all the resources that have that tag. You can of course request these, or if they are electronic resources can click on URL to immediate access.

# What does the ELIScat Tag Cloud look like?

Because tags are being added to resources each day, the Cloud will change but here is a snapshot:

# Why are some tags in larger font than others?

This is because there are more resources attached to that tag, than to others in the cloud.

# Who puts the tags on resources?

Any exporter with an ID and password can add tags.

# How can I add a tag?

Read the Help Sheet 'Adding Tags'

# **Need More Help?**

If you have difficulty logging in to the ELIS Catalogue and using any of its functions, please ask for help by emailing <u>library@export.ac.nz</u> or telephone 06-356-5656 ext.701. Print and file this in your <u>Guide to Study</u> for further reference.
